Recording in social work Jul 26 2020 Recording is regarded by most social workers as a necessary evil. The research from which this book arises found that recording is a highly complex and demanding aspect of professional practice. Why has such a critical activity received so little attention, despite the concerns over social work records identified with successive inquiries into tragic deaths? This highly topical book explores the often conflicting demands on social workers as they record information on the case files, and will stimulate a long overdue debate as to how to achieve more effective recording in social work.

EBOOK: Social Work, Poverty and Social Exclusion Jun 24 2020 What do we mean by the terms "poverty" and "social exclusion" in 21st century Britain? What impact do continuing austerity measures have on low-income families? How can social workers support and empower service users to escape poverty? An understanding of social division, social exclusion, and poverty is fundamental to the ethos of social work. This book relates poverty and social exclusion to social work practice, offering a fresh approach to the challenges social workers face in helping clients out of poverty. The book begins by examining the challenges posed by growing poverty set against cuts in services and tightening eligibility criteria. The book argues that the impact social exclusion and poverty has on service user's lives requires social workers to gain a greater awareness of both concepts and their relationship to social work practice. Chapters consider topical issues such as the role poverty plays in child protection issues, and the dilemmas social workers face in working with asylum seekers. A theme of the book is inequalities in health: that most service users suffer more illness, disability and premature death, because they are poor and excluded. Focused on what social workers can do in their practice to address social exclusion, the book supports students in developing relationship-based and community-oriented approaches that can actively alleviate poverty. Key features of the book include: Numerous quotations and vignettes give insights into social workers' and service users' real experiences. "What Do You Think?" exercises encourage students to actively engage with the issues and think critically about their understanding of poverty. Reflective questions are included to spark lively debate around ethics, beliefs and values. This

book is essential reading for undergraduate and postgraduate social work students at all levels. It will also be a key resource for sociology and social policy students seeking an understanding of poverty. "Dave Backwith's new book should be required reading for every social work student, as well as by managers, policy makers and experienced practitioners. Carefully researched and reasoned, it challenges social work to overcome the danger of treating poverty as the inevitable backdrop to practice and to actively address the intimate, daily, damaging impact of poverty in most service users' lives. Throughout, using frequent telling case studies, Backwith confronts the complexities of practice and asks big questions about the political and policy context of social work." Paul Bywaters, Professor of Social Work, Coventry University "Dave Backwith provides social work with a strong values-based argument for politically engaged practice to address poverty and social exclusion. He advocates for 'making space' to address poverty and social exclusion, with an approach that eschews individual and pathological responses, instead emphasising a community-based and collective /mutual aid orientation. The book is informed by ecological and health inequalities perspectives and with chapters on children and families, older people and mental health, should be essential reading for all social workers." Kate Karban, Senior Lecturer in Social Work, University of Bradford, Co-convenor, Social Work and Health Inequalities Network, 2010-2014 "This book provides a comprehensive review of theory, research and policy on poverty and social exclusion. It identifies the forces which have narrowed social work's responses to poor people, and how practice could become more generous and imaginative." Bill Jordan, Professor of Social Work, Plymouth University, UK "Dave Backwith has successfully argued that social workers need to practice with a full appreciation of the impact of poverty and social exclusion on the people who need their assistance. This is, as he argues, essential for all areas of social work. His book therefore represents essential reading for all connected to the delivery of social work, students, practitioners and managers alike." Mark Lymbery, University of Nottingham, UK

Applying Research Knowledge Mar 22 2020 Does the social work profession value research-based knowledge as a basis for social policy? Serving as a compass for the problems in society that need attention and resolution, the research base of social work may be the most imperative guide to social work practice. However, it is often overshadowed by the actual labor of the profession. This book combines research with practice, providing research knowledge in a workbook format that brings social work to life. This workbook provides exercises that enable readers to "learn by doing". This edition is broken down into more topic units, for ease of reference; and there are more questions to apply to each unit. Sample research studies featured in the book include Financial Victimization of the Elderly, the Role of the Eligibility Worker in Public Welfare, and Sexual Adjustment Following Spinal Cord Injuries. Educators, social work researchers, and social workers.

The Social Worker's Guide to the Care Act 2014 Feb 25 2023 The Care Act 2014 is arguably the most significant piece of legislation for social workers who work with adults, since the NHS and Community Care Act 1990. This book presents the information from the act, regulations and statutory guidance in a way that provides social workers with a good understanding of the legislation and how it applies to their role. Making extensive use of case examples that derive from the author's experience as a social worker, the book highlights the circumstances where professional judgment is required and explores issues that need interpretation such as significant impact on wellbeing. It covers the key stages of the 'care and support journey' - first contact, assessment of needs, prevention, consideration of eligibility, charging and financial assessment, care and support planning, and review. In addition, other chapters look at significant issues such as safeguarding and working with NHS colleagues. This book helps to improve the 'legal literacy' of social workers, i.e. the connecting of legal rules with professional priorities and ethical practice. It achieves this by helping social workers to better understand the legal framework within which they make professional judgements, and to apply their expertise in interpreting the law for the benefit of people with care and support needs. This readable and jargon-free book provides: a solid foundation for social work students in developing a critical understanding of the Care Act and its application, help for experienced social workers with developing the critical reflection necessary to enhance their ability to make professional judgements a source of reference which social workers can use to evaluate their local systems, policies and procedures.

Air Force Enlisted Force Management Jul 06 2021 A fundamental goal of the Air Force personnel system is to ensure that the manpower inventory, by Air Force specialty code and grade, matches requirements. However, there are structural obstacles that impede achieving this goal. To remove one of those obstacles, the authors propose a methodology that would marginally modify grade authorizations within skill levels to make it possible to better achieve manpower targets.
